

The `eso-pic` package*

Rolf Niepraschk
Rolf.Niepraschk@gmx.de

1 Introduction

This package makes it easy to add some picture commands to every page at absolute positions.

2 Usage

See also the example L^AT_EX documents (`eso-*.tex`).

2.1 Basic commands for adding L^AT_EX stuff to the page background

`\AddToShipoutPictureBG`

All the picture commands which are parameters of an `\AddToShipoutPictureBG` command will be added to the internal macro `\ESO@HookIBG`. This macro is part of a zero-length `picture` environment with basepoint at the lower left corner of the page (default) or at the upper left corner (package option "texcoord"). The `picture` environment will be shipped out at every new page.

`\AddToShipoutPictureBG*` works like `\AddToShipoutPictureBG` but only for the current page. It used the internal macro `\ESO@HookIIBG` which contents will be removed automatically.

For compatibility the macros `\AddToShipoutPicture` and `\AddToShipoutPicture*` are aliases for `\AddToShipoutPictureBG` and `\AddToShipoutPictureBG*`.

Works like `\AddToShipoutPictureBG` but the picture commands are on the top oft the normal document content.

A call of `\ClearShipoutPictureBG` clears the contents of `\ESO@HookIBG`.

For compatibility the macro `\ClearShipoutPicture` is an alias for `\ClearShipoutPictureBG`.

A call of `\ClearShipoutPictureFG` clears the contents of `\ESO@HookIFG`.

Allows a length as parameter to a picture command. Note that this macro is no more necessary when using `\usepackage{picture}`.

`\gridSetup[gridunitname]{gridunit}{{labelfactor}}{griddelta}{{gridDelta}}{gap}`. For details see the implementation section.

*This document corresponds to `eso-pic` v2.0e, dated 2015/04/20.

2.2 Package options

| Option | Value | Comments |
|---------------------------|-----------------------------|---|
| <code>pscoord</code> | empty or <i>true, false</i> | The zero point of the coordinate system is the lower left corner of the page (the default). |
| <code>texcoord</code> | empty or <i>true, false</i> | The zero point of the coordinate system is the upper left corner of the page. |
| <code>grid</code> | empty or <i>true, false</i> | A grid is drawing; default: false. |
| <code>gridunit</code> | <i>mm, in, bp, pt</i> | Distance between gridlines are multiples of <code>gridunit</code> . default: mm. |
| <code>gridcolor</code> | a valid color name | Color of the main gridlines; default: black |
| <code>subgridcolor</code> | a valid color name | Color of the subgridlines; default: black. |
| <code>subgridstyle</code> | <i>solid or dotted</i> | ‘dotted’ is very slow! default: solid. |
| <code>colorgrid</code> | empty or <i>true, false</i> | Shortcut for ‘grid=true’, ‘gridcolor=red’ and ‘subgridcolor=green’; default: false. |
| <code>dvips</code> | empty or <i>true, false</i> | Is also true if the package option <code>dvips</code> is used by <code>color</code> or <code>graphics</code> . If true package <code>eepic</code> is loaded for better performance of dotted lines. |
